## Classic Sport Ignition

The origin of Classic Sport Ignition lies within a passion for classic cars. Years of hands on experience in automotive electronics have enabled the CSI company to develop the ultimate ignition for your classic car.

We at Anglo-Parts have tested many other systems, some are not practical in use, others fail when driving in hot weather conditions and others are quite difficult to fit. Since 2010 we have been driving our MGB with a CSI ignition system and have been very happy with the test results shown. We later installed this system in our E-type, also with fantastic results. The 16 carefully tuned pre-programmed advance curves are at your disposal to choose from, just find the perfect one for your type of car. Choosing between the available curves is very easy. All you have to do is remove the distributor cap and change the curve to your desired position simply by using a screwdriver.

A special system has also been made for the MGA Twin Cam owners. Access to the distributor on these cars isn't easy, so CSI have made a system, where you choose the curves from the drivers seat.

All CSI systems are installed into a special housing which can't be distinguished from original, your classic will keep its authentic look. We recommend changing the H.T. wiring to a non-copper wire type and the caps to 'push-on' types to give the best results. Early cars with a mechanical tachometer are easy to convert to negative earth, it will give you the possibility to fit a GPS or just reload your mobile using the cigar lighter connection. For those cars we only stock the negative earth distributor. The T-Type is probably the only exception, were the purist might not want to change the ground and wants to keep the car positive earthed.

Below we list the most common types with vacuum unit fitted. For tuned engines you can order a non vacuum type (as used for the MGA Twin Cams), please contact your local shop for more information.

CSI ignition systems have been tested in heavy endurance rally's, like the Carrera Copacabana, the Monte-Carlo Historique, the Wintertrail and the Mille Miglia.

Part nr.	Car type	Ground	Housing	Euro
181.332	MG T Type	positive	M23D4	330.09
